AWARDS AND RECOGNITIONS

Awards & Scholarships:

- 2023- Leadership scholarship, *HEC Montreal,* $2,000: awarded to students who have distinguished themselves through significant community involvement
- 2022- Excellence scholarship, *Fondation J. Armand Bombardier*, $6,000: awarded to two doctoral students each year for academic excellence
- 2021- In-program scholarship, *HEC Montreal*, $20,000 per year (2021-2025), exemption of tuition fees and $5,000 CAD in research funding
- 2019- In-program scholarship, *Southern Methodist University,* $15,000 US
- 2015- Excellence scholarship, *Bishop's University, $*3,500

National Research Fellowships:

- 2023-2026 Canada Graduate Scholarship (CGS D), *Social Science and Humanities Research Council of Canada (SSHRC)*, $113,333 (ranked 14 out of 146 in my category)
- 2022–2025 Doctoral Fellowships, *Fonds de Recherche du Québec (FRQ)*, $84,000 (2023-2025 : $63,000 declined)

Research Grants*:*

- 2024–2025 Mitacs Accelerate Fellowship, *Mitacs,* $15,000: granted funding to support my research project conducted in collaboration with industry partners
- 2023–2024 Mitacs Accelerate Fellowship, *Mitacs*, $30,000: granted funding to support my research project conducted in collaboration with industry partners

RESEARCH EXPERIENCE

AQSL, Research Consultant, Montreal 2025-2025

- Independent research contract with industry partner to examine the effect of book fairs on sales for eight geographical clusters.

HEC Montréal, Research assistant, Montreal 2021-2025

- Ongoing presentation for the Marketing Research Participation Program (MRPP) to undergraduate students
- Ongoing management of the research platform and assistance to participants and researchers

Mitacs Accélération, Research Intern, Montreal 2022-2025

- Industry collaboration with "*La Société de gestion de la Banque de titres de langue française*" (BTLF), *Synapse C,* and "*L'association québécoise des salons du livre*" (AQSL), funded by Mitacs Accélération

Chaire des commerces Omer Deserres, Research Assistant, Montreal 2022-2024

- Assisted in the preparation of several expert reports for consumer protection attorneys
- Analyzed sales promotions, advertising campaigns and marketing practices to assess compliance with consumer protection laws

Group for Research in Decision Analysis (GERAD), Research Assistant, Montreal 2023-2023

- Data collection for a literature review on operations research in marketing

TEACHING & MENTORING EXPERIENCE

HEC Montréal, Lecturer *(full course),* Montreal

- *Introduction au marketing* (BBA), Fall 2025

- *Introduction au marketing* (BBA), Winter 2025
- *Introduction au marketing* (BBA), Fall 2024

HEC Montréal (Qc), School Ambassador, Montreal 2022-2024
- Mentor for fellow Ph.D. students applying for grants from funding agencies
- Ambassador for prospective Ph.D. students, promotes the research program and addresses inquiries to facilitate informed decision-making

HEC Montréal, Teaching assistant, Montreal 2021-2025
- *Analyse des bases de données en marketing* (MSc)
- *Deployment of tactics in marketing* (MBA) / *Déploiement de tactiques en marketing* (MBA)
- *Strategic Marketing* (MBA) / *Marketing stratégique* (MBA)
- *Marketing des arts et de la culture* (BBA)
- *Le marketing des organismes culturels* (Graduate diplomas)

PricewaterhouseCoopers, *Experience Senior Associate,* Montreal 2020-2021
- Acting manager on several audits where I supervised, trained, and mentored junior associates and interns
- Led onboarding workshops for new hires

Université de Sherbrooke, Academic Coach, Sherbrooke 2019-2019
- Supervision of teams for strategic case studies in undergraduate competitions

PROFESSIONAL EXPERIENCE

PricewaterhouseCoopers, Assurance Associate **(**external Auditor), Montreal
Experience Senior Associate 2020–2021
Experience Associate 2018–2019
Associate 2017–2018

Parks Canada, Summer Marketing Intern, Montreal 2016–2016

MEDIA MENTIONS

SERVICE

Ad Hoc Reviewer :
- Journal of International Business Studies

VOLUNTEERING & OTHER DEVELOPMENTS

Fondation Mères avec Pouvoir (Qc), member of Cercle de Jeunes Philanthropes 2021-
- Role: Customer experience and relation management (donors, sponsors, event partners)
- Other tasks: Event planning and event coordinator, fundraising activities and ambassador
- Raised up to $70,000 in net revenue at the last event, and up to $24,813 in personal fundraising activities

Deep Vellum (TX), Consulting project for a small cultural organisation 2019-2019

SKILLS

- **Software proficiency:** Python3, R, SPSS, SAS, MySQL, MS Office, Tableau, Oracle, Alteryx, Bloomberg, Acomba
- **Accounting knowledge:** US GAAP principles, Audit reporting, SAP expertise, trend analysis

LANGUAGES AND CITIZENSHIPS

- **Languages**:
  - French- first
  - English- fluent
  - Italian- elementary
- **Citizenships:** Canadian, Belgian (EU)

Vanasse, C., Legoux, R., and Carrillat, F. "Beyond discounts: The effect of symbolic special-day promotions on product sales," currently under 2st—round revise and resubmit at the *Journal of the Academy of Marketing Science* (Job Market Paper)

The present research addresses an understudied but widespread type of promotion: symbolic special-day promotions that provide symbolic benefits by appealing to consumers' identity, values, and/or aspirations through social initiatives. To that effect, we examine a yearly symbolic special-day promotion targeting books from domestic authors in the Canadian province of Quebec while providing few or no price incentives. The results show a significant increase in sales for promoted products and, to a lesser extent, for non-promoted ones, thus indicating category growth rather than brand switching. Importantly, we find no evidence of a dip in sales just before or just after the promotion. Additionally, the promotion reduces price sensitivity and is more effective for products from lesser-known brands. These findings provide economic validation for symbolic special-day promotions with no evidence of the typical drawbacks associated with price promotions. Further, we expand the benefit congruency framework as an underlying mechanism by showing its relevance for promotions offering symbolic rather than utilitarian or hedonic benefits.

Vanasse, C., Carrillat, F., Legoux, R., "Beyond recognition: the full value of awards on sales to consumers and intermediaries", *submission to Journal of Marketing pending final edits* (1st dissertation article)

Drawing from signaling theory and including key components of cultural products, the present research seeks to understand the role of awards in influencing sales to consumers and information intermediaries (infomediaries). To this end, the study focuses on the effect of different literary prices on sales of French-language books in the Canadian market to end consumers and infomediaries—i.e. libraries—from 2014 to 2022. The results show the importance of awards as third-party indicators of quality in increasing subsequent sales of award-winning books, at both consumer and intermediary levels, and that an award with strong signaling value for one type of buyer may not be as effective in conveying product quality for another, depending on the award dimension and the informational cues conveyed by the book. What's more, the relationship between awards and sales persists well beyond what is normally expected for entertainment products. The research provides a much-needed understanding of the mechanism guiding the purchasing decisions of institutional infomediaries in relation to consumer behavior. We find, that, consumers and infomediaries respond to awards through distinct temporal patterns. By highlighting the influence of awards on these pivotal players, our study not only fills a gap in the literature but also offers tangible insights for practitioners.

Vanasse, C., Grégoire, Y., "Crashing the tread: An investigation of public sentiment & stock response toward corporate apologies" *data analysis completed* (2st dissertation article)

Drawing on signaling theory, the study focuses on the internal signals sent by companies following unintentional negative public crises, and examines the strength and credibility of these signals in relation to companies' response strategies. The research examines the effect of various apology statements on 1) informal infomediaries (i.e. Reddit users) and 2) shareholders. In addition, it explores the effect of the signal subsequently sent by Reddit users to shareholders via online sentiment. To test the full process by which a statement of apology can influence online sentiment and, subsequently, financial performance, we analyze over 100,000 comments from 170 posts discussing 52 different companies on Reddit. The research contributes to the understanding of informal intermediaries and the role of the company's

statement as a signal on subsequent intermediary behavior (i.e. online sentiment) and shareholder reactions.

Carrillat, F., Plewa, C., Pupovac, L., **Vanasse, C**., Wilmott, T., Legoux, R., and Napolova, E., (2024), "Impact of corporate social responsibility initiatives on consumer response: A meta-analysis," *Journal Business Ethics*

Research into consumer responses to corporate social responsibility (CSR) initiatives has expanded in the past four decades, yet the evidence thus far provided does not paint a cohesive picture. Results suggest both positive and negative consumer reactions to CSR, and unless such mixed findings can be reconciled, the outcome might be an amalgamation of disparate empirical results rather than a coherent body of knowledge. The current meta-analysis therefore tests whether the mixed findings might reflect consumers' distinct, altruistic inferences across various contingency factors. On the basis of 337 reflect sizes, involving 584,990 unique respondents, in 162 studies published between 1996 and 2021, this study reveals that altruistic inferences are central to the current CSR paradigm, such that they mediate the effects of CSR initiatives on consumer responses across multiple contingencies. The mediation by altruistic inferences is stronger (weaker) in conditions favorable to dispositional (situational) motive attributions. Furthermore, consumers respond more favorably to cause marketing or philanthropy rather than business-related CSR initiatives, when the initiative is environmental (vs. social), the firm's offering is utilitarian (vs. hedonic), the CSR initiative takes place in self-expressive (vs. survival) cultures and in earlier (vs. later) periods. These findings offer several ethical implications, and they inform both practical recommendations and an agenda for further research directions.

Vanasse, C., Carrillat, F., Legoux, R., and Hadida, A. "The Where and How of Quality Signals: A Meta-Analysis of the Effect of Star Power on Movie Performance in International Markets", *Ready for submission pending final edits*

Although international revenues are essential to the economic viability of cultural products, how their quality signals' diagnosticity is affected by *where* (which market) and *how* (simultaneously or sequentially) they are introduced has not been examined. We do so by conducting a meta-analysis of the relationship between star power (i.e., the star appeal of movie contributors) and movie box-office (BO) performance across countries. Based on 148 studies and 395 effect sizes covering movies released in 39 countries over 50 years (1970-2020), a meta-regression shows that star power has a stronger influence on BO in countries high on Inglehart's survival rather than self-expression values. Moreover, simultaneous introductions are superior to sequential ones unless release gaps exceed 55 days. Theoretically, our findings about the effect of survival values support the view that the mechanism underlying the quality signals of cultural products is tied to consumption risk reduction and information screening rather than audience conformism. The benefits of simultaneous vs. sequential introductions suggest that the effectiveness of signals depends more on their intensity (concentrated in a single introduction) than on their diffusion potential (amplified by the initial domestic performance). Managerially, simulations show incremental revenue from star power ranging from $23,000 to nearly $50 million depending on *where* and *how* cultural products are introduced internationally.
